2021

Die "Thread Family" ist eine Gruppe höhenverstellbarer Kleinmöbel, bestehend aus einem aus Nussbaum oder Eiche gefertigten Oberteil und farbigen Stahluntergestellen. Die Familie besteht aus sechs Mitgliedern: Small Stool, High Stool, Bistro Table, sowie Thread X, Higher Desk und Garderobe.

Das charakteristische Hauptmerkmal ist ein aus Walnussholz oder Eiche gedrehtes 40 mm starkes Gewinde mit sichtbar und dekorativ verzapfter Sitzfläche. Die Holzoberfläche ist mit Hartöl versiegelt um die natürliche Schönheit des Holzes zu betonen und das geschmeidige Drehen des Holzgewindes während der Höhenverstellung zu sichern. Die kontrastierenden Gestelle sind aus Präzisionsstahlrohr geschweißt und sind hochwertigen Fahrradrahmen nachempfunden.

Als flexibel einsetzbare Objekte konzipiert, eignet sich die Thread Family sowohl zur platzsparenden Möblierung als auch zur Ausstattung weitläufiger Räume. Die Höhe des Einzelmöbels passt sich adaptiv den sich verändernden Bedürfnissen des Nutzers an. Jedes Thread Family Mitglied kann somit zu einem lebenslangen Begleiter werden.

Thread betont die natürliche Qualität des Werkstoffs Holz und gibt einzeln und in der Gruppe ein gutes Bild ab. Durch die Kombination aus traditionellem Handwerk und zeitgenössischem Design wird die Thread Family zu einer zeitgerechten Möbelserie ohne überflüssige Details.

Die Mitglieder Small Stool, High Stool, Bistro Table und Higher Desk der Thread Family sind inzwischen fünfmal ausgezeichnet worden: Winner Interior Innovation Award '14, iF Product Design Award '14, Special Mention German Design Award '14 sowie Designpreis der Bundesrepublik Deutschland Nominee '14 und Green Product Award '14 Nominee.

"Thread Family" is a set of small height-adjustable furniture pieces featuring a thread and seat lathed from walnut or oak on a welded steel base available in many colours. The family consists of six members: Small Stool, High Stool, Bistro Table, Garderobe, Thread X and Higher Desk.

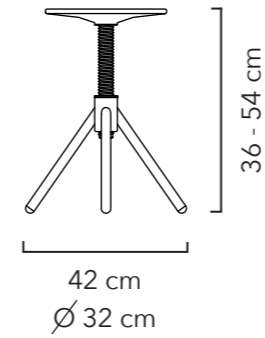

The main feature is the lathed element, consisting of a 40 mm thread cut from walnut or oak, connected to the seat by a visible and well crafted cross-shaped wedge-joint. Its surface is finished with hardwood oil to enhance the natural appearance and to ensure a smooth running of the thread when adjusting the seat height. The steel base is welded from precision mild steel tubes, inspired by high quality bicycle frames.

Conceived as objects of high flexibility, the Thread Family works in small spaces and in large places alike. They rise and adapt to the needs of the user and every piece can become a lifelong companion. Thread emphasizes the natural qualities of wood and works well as a single piece and in a group.

The whole Thread Family has now been honoured five times: as a "Winner" at the Interior Innovation Award '14, as a "Winner" at the iF Product Design Award '14, with a "Special Mention" at the German Design Award '14, with the "Nominee" at the Green Product Award '14 and with the "Nominee" at the Designpreis der Bundesrepublik Deutschland '14.

Tangle ist eine skulpturale hängende Lichtinstallation, die aus drei ineinander verschränkten Modulen und einem Einzelmodul besteht.

Tangle ist inspiriert durch modernen Schmuck und raumgreifende Mobiles. Das handpolierte Messing im Zusammenspiel mit dem Stein erfordert in der Fertigung höchste handwerkliche Präzision. Durch eingebaute LED-Bänder spielt die Leuchte elegant mit Reflexion und Diffusion der unterschiedlichen Materialien Messing und Marmor.

Tangle erhielt beim German Design Award 2016 die Auszeichnung "Special Mention".

Tangle - a sculptural pendant light installation - consisting of three intertwined modules and one single element.

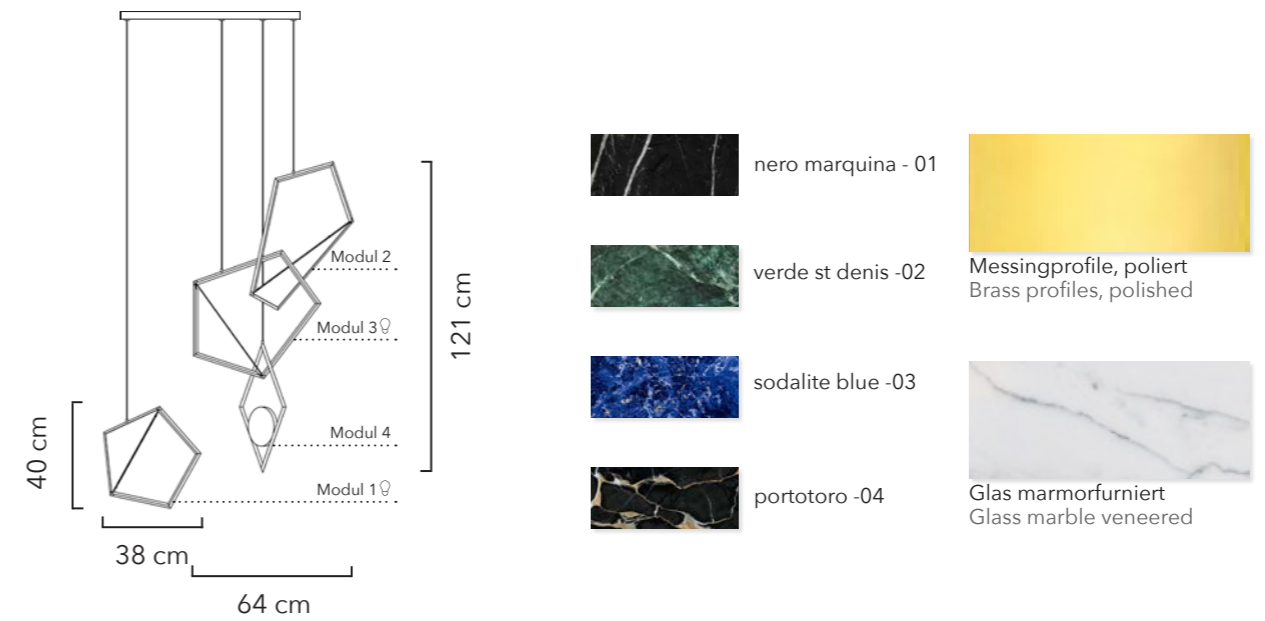

Tangle is inspired by modern jewellery, spatial mobiles and the crystalline molecular structure of natural stone. The intricate combination of brass and hand picked stone requires the highest standard of craftsmanship and precision. Integrated LED strips accentuate the different characteristics of both brass and stone in terms of reflection and light diffusion.

Tangle received a "Special Mention" at the German Design Award 2016 by the jury.
